COMPLEXITY IN
CONGENITAL CARDIOLOGY

11th scientific meeting Swiss Society of Pediatric Cardiology with Parallel Nursing Sessions

Friday, November 15th 2019

9:00 to 17:00

Hörsaal University Children's Hospital
and Bungertweg 7; Room V3

Dear Colleagues,

We would like to invite you to our

11th scientific meeting of the Swiss Society of Pediatric Cardiology in Zurich.

It will take place on November 15th at the University Children's Hospital Zurich, Steinwiesstrasse 75, 8032 Zürich from 9.00 to 17.00 h.

This year, the scientific meeting will be devoted to the "Complexity of Congenital Cardiology".

The morning sessions feature presentations by experts from the pediatric cardiology centers throughout Switzerland. Their focus will be on challenges in perioperative care of children treated for severe congenital heart disease and long-term follow up in highly specialized outpatient clinics for pediatric and adult patients.

Professor Tsang from the UK will provide the key note lecture in the afternoon and will address the future of congenital cardiac surgery.

The parallel nursing sessions provide an interesting program on working with patients and their families, feature challenges following cardiac surgery, transcultural care and medication therapy as well as self-management.

If you need support or have questions (hotel, etc.), please don't hesitate to contact our team Michaela.stiefel@kispi.uzh.ch

With kind regards on behalf of the organizing committee

Professor Walter Knirsch,
Scientific Secretary,
Swiss Society of Pediatric Cardiology

Gaby Stoffel,
Scientific Secretary,
Interest Group Congenital Heart Disease

Schweizerische Gesellschaft für Pädiatrische Kardiologie
Société Suisse de Cardiologie Pédiatrique
Società Svizzera di Cardiologia Pediatrica

Program

Complexity in Congenital Cardiology

Friday, November 15th, 9.00-17.00 h, Hörsaal University Children's Hospital Zurich

9.00-9.30h: Registration, Welcome, Coffee and Gipfeli
